^a State motor gasoline prices are the same for the commercial, industrial, and transportation sectors.

^b Due to consumption weighting, U.S. average commercial price is \$25.46 per million Btu, U.S. average industrial price is \$25.47 per million Btu, U.S. average transportation price is \$25.53 per million Btu, and the U.S. average price of all sectors is \$25.53 per million Btu.

Where shown, (s) = Btu value less than 0.05.

Note: Motor gasoline estimates include fuel ethanol blended into motor gasoline. • Totals may not equal sum of components due to independent rounding.

Sources: Data sources, estimation procedures, and assumptions are described in the Technical Notes.
